

## A Powerful Solution for Specialty Applications

XALT Energy combines proven lithium ion technology with manufacturing expertise, our deep knowledge of the specialty application market and key strategic partners. We power specialty vehicles with complete system solutions. These include cells, packs, control systems/software, system support, monitoring/field service and R&D.

XALT Energy delivers advanced energy storage solutions for hybrid and all-electric specialty vehicles. For customers around the world, we manufacture lithium ion power sources that deliver:

- ▶ High power and energy densities
- ▶ Long life cycles
- ▶ Lower mass and compact sizes for packaging flexibility
- ▶ Quality and reliability

XALT Energy has the design expertise, engineering/integration capability and manufacturing capacity needed to produce high-quality, turn-key battery systems. We also offer real-time monitoring, field service and support. This unique combination gives you one-source accountability and a single warranty for the entire system.

Through a partnership with Williams Advanced Engineering, XALT Energy explored the limits of hybrid propulsion performance in the most demanding and fastest form possible: Formula E racing.
