

# A Powerful Solution for Energy Storage

XALT Energy is a leader in applying lithium ion technology to high-energy, high-power storage solutions for:

- ▶ Marine and maritime
- ▶ Commercial transportation
- ▶ Grid and stationary
- ▶ Industrial motive
- ▶ Automotive transportation

Our state-of-the-art facility in Midland, Michigan, was designed and built from the ground up – expressly to manufacture large-format lithium ion cells. The fully automated facility features high-end robotic stacking and vision systems, clean rooms and nearly 700 megawatt hours of cell manufacturing capacity for enhanced quality, reliability and consistency.

We unite viable, scalable, large-format cell technology with manufacturing expertise, deep market knowledge and a wide range of strategic partners to help power our customers' innovations through complete system solutions, including:

- ▶ Cells and packs
- ▶ Control systems and software
- ▶ System support
- ▶ Monitoring and field service
- ▶ Research and development

XALT Energy is one of only a few companies in the world with the design expertise, engineering capability and manufacturing capacity to develop and produce a high-quality, turn-key battery system – while also offering real-time monitoring, field service and support. This gives you one-source accountability and a single warranty for the entire system.

Our corporate operations, engineering and manufacturing are based in the United States. We also have sales offices in Asia-Pacific and the Middle East. With these resources, XALT Energy provides powerful solutions to customers anywhere in the world.
